EDUCATION

University of Guelph: Bachelor of Computing Honours, Computer Science (Co-op) | (Sep. 2022-PRESENT)

- Pursuing a minor in Business, with a focus on Marketing and Management courses
- Admitted with entrance Academic Scholarship (90% - 94.9%)

Academic Projects:

Professor Management Project | (Mar. 2023)

- Created an application in C that utilized multiple different data structures and sorting methods to sort and categorize lists of professors and their related class statistics for the term.
- Allowed for creation, deletion, and searching with various filters.

Mancala Game Project | (Nov. 2023)

- Created a version of the board game Mancala, utilizing Java and adhering to common object-oriented best practices.
- Implemented robust error detection and utilized standard test cases for efficient testing of the application.

PERSONAL PROJECTS

3JS Website | (Nov. 2024 – PRESENT)

- Working to create a personal website that utilizes 3JS and JavaScript to render a dynamic scene in 3D through the browser. This uses knowledge from my previous classes and design knowledge from current ones

EXTRA CURRICULAR EXPERIENCES

Team Member - FRC Team Dave | (Sep. 2017- Jul. 2021)

- Worked in the programming sub team to code the robots' controls using Java.
- Gained valuable professional teamwork experience and communication skills.
- Competed against hundreds of teams and successfully advanced to the world stage of FRC in Detroit with the help of the team's robust control system designed by our sub team.

Team Ambassador - First Lego League | (Sep. 2018 – May. 2020)

- Helped teams with coding problems in Java and general support, acknowledged for outstanding work.
- Gained valuable communication, customer service, issue resolution and troubleshooting skills.

WORK EXPERIENCE

Managed Desktops Student IT Technician - University of Guelph | (Apr. 2024-Dec. 2024)
